SMART FLIGHT SCHEDULING

FltPlan.com

A Garmin Company

360° Coverage from Initial Trip Requests to Post-Flight Reporting

Master your flight scheduling with FltLogic, the only scheduling program that integrates with FltPlan.com. FltLogic offers a comprehensive suite of features from trip requests and approvals to flight planning and post-flight reporting to meet your complex and changing needs.
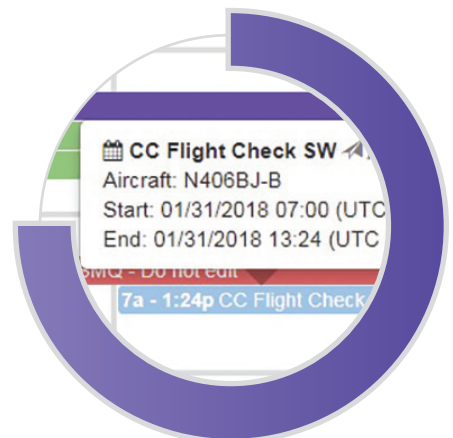

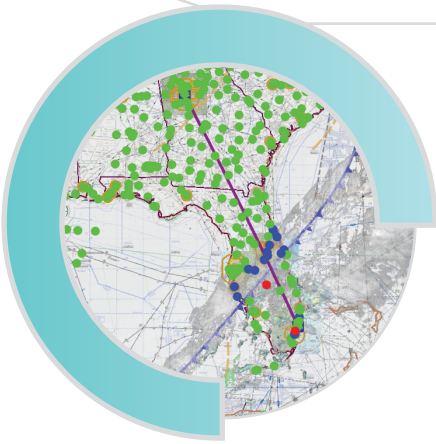

CALENDAR

- Choose monthly, weekly, or daily views
- Color code by aircraft and type of event for easy reference
- View all events for one user or one aircraft
- View aircraft availability
- Filter by user, event title, new trips, event status, SOB, tail number, aircraft make/model, crew names, departure/arrival airport, date, or time
- Show flights in Zulu time
- Pilot and aircraft currency indicator shows pending and expired
- Staff schedule combines information from events, duty time and time off schedules for all personnel

PRE FLIGHT

- Create and edit single or multi-leg flights, training, maintenance, and other events
- Create and manage aircraft profiles, including type, color and performance data
- Schedule events without a crew with the Open Trip feature. Authorized pilots receive notification and can accept or reject trips

- Repeat recurring events for up to 6 months
- Carry over pilot, crew, and passenger information when adding legs to a scheduled event
- Store infrequent passengers as temporary
- Quick change option allows for last minute crew and passenger modifications to single or multiple legs
- Event creation automatically triggers creation of a preliminary flight plan in the captain's FltPlan.com account
- Event alerts indicate issues such as double bookings, exceeded flight time, or insufficient runway length
- Duty time function shows duty time violations
- Scheduler can push a new event notification to all parties assigned to a trip
- Search for airport and FBO information or view and book hotel, rental car, catering, and limousine reservations
- Assign departments by user and by leg
- Enter default fuel burn and fuel purchase units
- For Flightdocs customers, a dashboard displays maintenance status plus APU, engine, and

View trip details, send trip sheets, and edit events from the calendar. Filter your calendar view by aircraft or pilot, and day, week, or month.

📅 CC Flight Check SW ✈
Aircraft: N406BJ-B
Start: 01/31/2018 07:00 (UTC
End: 01/31/2018 13:24 (UTC
SMQ - Do not edit
7a - 1:24p CC Flight Check

View your route with a variety of base maps and weather overlay options in FltPlan's Map Builder.

POST FLIGHT

- Pilot log sheet for post flight reporting can be completed on the FltLogic website and through the FltLogic app
- Track block and flight time, approach, takeoffs and landings, night and instrument hours, fuel burned and purchased, APU hours and cycles, airframe hours and cycle tracking, and HOBBS Time
- Upload receipts and/or track expenses by user or by aircraft
- Pilot duty time report automatically updates post-flight

LOCATIONS

- Quickly reference airport and FBO information on FltPlan.com
- Add preferred FBOs and private hangar information for your home airport
- Fuel information and pricing is immediately available on FltPlan.com

FltLogic integrates with FlightBridge™ for hotel, rental car, limousine, and catering reservations.
