

New Feature: Dynon Avionics

There is no need to manually type your route into your Dynon Avionics SkyView system.

Now, you can make a copy of the flight plan you created on the FltPlan website and export it to your Dynon Avionics SkyView system using a USB drive.

To use this new feature, please follow the instructions below:

- Go to the **Main Menu** page. Click the **Settings** button, then click the **Edit Aircraft List** link.
- Look for the column labeled, **Dynon* .gpx file**.
- Put a checkmark in the check box for the aircraft you want to enable this feature for.
- Press the **Save** button to save your information.
- Display your NavLog, and on the bottom right side click on the link labeled **GPX Flight Plan**.
- Save the file to a USB flash drive.
