- The Jeppesen Mobile FD selection will be applied to any saved or modified flight plans after this selection is made
- To enable transfer for existing flight plans, select Quick Change on the Active Flight Plan list
- Transfer the flight plan to the FitPlan Go app from the FitPlan.com website through auto syncing.
- To ensure auto syncing is ON, enable Notifications for FitPlan Go in the Settings on your iPad, and enable Notifications in the Settings on the FitPlan Go app

Open FitPlan Go App

- Select the NavLogs or Maps icon
- Click on the Connectivity icon
- Select **Jeppesen FliteDeck** option from the drop-down menu
- Select the flight plan that you want to transfer and the Jeppesen app will automatically open

Jeppesen FliteDeck App

- The Jeppesen FliteDeck app will automatically open
- A pop-up window will appear with the options to Load, Save, or Decline the flight plan route that is being transferred
- Tap Load to have the flight plan populate on the Jeppesen FliteDeck app
- Tap Save to have the flight plan saved onto the Jeppesen FliteDeck app
