PRO	Several areas of Class F of restricted airspace (CYRs) have been established in the Alma area for flight testing of Remotely Piloted Aircraft (RPA). These CYRs are activated occasionally by NOTAM with 48 hours prior notice. No person shall operate an aircraft within an active CYR unless the flight has been authorized by the User Agency as stated in the Designated Airspace Handbook (DAH). When CYR651 is active and access to the Alma airport is required, to avoid delays pilots should make prior arrangements with the User Agency for authorization to operate within the CYR. Pilots can contact Alma UNICOM MF 122.35 for authorization but unless the flight is essential such as MEDEVAC, police, emergency, etc., access may be delayed. Once authorized, pilots must enter and exit CYR651 from the northeast and operations are restricted to circuit procedures for arrivals and departures from the airport only. See Alma VTPC for a depiction of the CYRs.	
CAUTION	Parachute jumps over aprt to 12,500 ASL, (DT 12-24Z) May-Sep. Possible win maint eqpt on rwy outside ops hrs. Migratory bird activity Apr-Nov.
