| PRO      | <p>Pilots should refer to Canadian Airport Charts (CAC) to obtain details on established hot spots, prior to operating on maneuvering areas. CAC are available for free on the NAV CANADA website.</p> <p><b>DE-ICING OPERATIONS</b></p> <p>1. Ctc de-icing provider 30 min prior to dep if de-icing is rqrd. Notify de-icing provider of parking location, planned runway for dep and any special treatments prior to pushback: ICEMAN 122.950 OR 902-410-7748.</p> <p>2. De-icing provider will assign de-ice pad and advise when ready.</p> <p>3. DO NOT PUSH prior to assigned de-ice pad being ready.</p> <p>4. To mitigate congestion on the APN, QUEUING for de-icing is NOT ACCEPTABLE.</p> <p>5. Monitor Halifax GND 121.9 for all APN movement.</p> <p>6. Follow instructions to designated de-ice pad.</p> <p>7. Advise ICEMAN immediately once brakes set, acft configured and engines at idle.</p> <p>8. After de-icing, configure acft for taxi, however, DO NOT MOVE ACFT.</p> <p>9. Once instructed, ctc Halifax GND 121.9 for taxi.</p> |
| CAUTION  | Extensive bird activity in vic of rwys Oct-Mar.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
