

LOW VISIBILITY PROCEDURES

Operations in Reduced and Low Visibility Conditions

- Runway 06 is certified for use in low visibility operations (RVR600).
- Runway 24 is certified for use in reduced visibility conditions (RVR1200).
- Plan activation is mandatory when one of the RVR readings or the reported ground visibility is below $\frac{1}{2}$ SM. Runways 24 and 06 can be used.
- When the reading of one of the RVR readings or the reported ground visibility is less than $\frac{1}{4}$ SM while remaining at or above $\frac{1}{8}$ SM, runway 06 must be used.
- Only one aircraft movement (RVOP and LVOP) is authorised on the manoeuvring area. In low visibility operation (LVOP), it is mandatory that the "Follow Me" vehicle escorts the aircraft.
- With the exception of aircraft returning to aprons, movement of all traffic ceases when one of the RVR reading or the reported ground visibility is below $\frac{1}{8}$ SM.
- When the two RVR readings or the reported ground visibility increases and indicates $\frac{1}{2}$ SM or more, normal operations may resume.
